The Iteration Artist UI

Ben Richardson | December 29, 2018

Art Image

Use object type: [drop-down]

Iterations: [{1-500}]

Jump to: [x]

Unit image

[Go {button}]

Current Iteration: [{readonly}]

Total items used: [{readonly}]

New items: [{readonly}]

Description:

list<ArtType> (type based on EF db.types table)
displayObject

art image, curr iteration, total items, new items: all set to values in DisplayObject

On load,
   fill list<ArtType> with rows in db.Types table.
   set dropdown.text = list<ArtType>.First.Name

On dropdown.Text.Change
   set UnitImage = list<EFType>[name].image

On click Go button:
   if JumpTo.true:
     set DisplayObject = data from service layer with iteration # = iteration.text
   else
     for (int i = 1; i <= iteration.text; i++) {
       set DisplayObject = data from service layer with iteration # = i;
       wait 1 second }
